

Artificial Intelligence Demystified

Maven Partners is delighted to bring to Australia one of the world's leading expert voices in Artificial Intelligence, Machine Learning and Robotics.

Mike Lloyd will conduct a number of sessions in Melbourne and Sydney, entitled 'Demystifying A.I.', focusing specifically on applications and indeed opportunities for finance professionals and accountancy practices.

A.I. is a domain that is often shrouded in complexity and abstract mathematical concepts. This three hour event aims to 'democratise' A.I. by giving non-experts the basic knowledge and skills needed to navigate the complexities of A.I., to understand what is already available for use, and to provide independent advice on how to further develop your own skills.

MELBOURNE
29 November

SYDNEY
30 November
